

California OES Weather Threat Briefing

Friday, August 28, 2020
9:00 AM PDT

- **Day 1 (Friday):** A moderate to high risk of heat related health impacts will continue for one last day across interior portions of Southern Region.

National Weather Service
*Western Region Headquarters
Regional Operations Center
Salt Lake City, UT*

WEATHER KEY POINTS

08/28/20 - 09/03/20

Friday

- Very little to no thunderstorm activity is expected today
- Moderate to high risk of heat related health impacts continues today across interior portions of Southern Region
 - Low to moderate heat impacts are also expected across Inland Region
- Reduced air quality will still remain an issue due to the extensive smoke being produced by the numerous wildfires across the state

Saturday-Thursday

- Cooling temperatures will lead to decreasing heat concerns through the weekend, followed by warming again Tuesday-Thursday
- Elevated fire weather concerns will likely persist statewide due to warm temperatures, low humidity, and occasionally gusty conditions
- The chance of thunderstorms could increase across interior portions of Southern Region over the weekend and into the beginning of next week
- Reduced air quality will still remain an issue due to the extensive smoke being produced by the numerous wildfires across the state
